Wrapped in Stylish Designs

Newels and columns can do double duty as both vital structural components and dramatic visual elements.

• Choose from standard offerings or create custom shapes and sizes including flat, raised, recessed, chamfered, fluted, tapered, or turned styles.
• Create custom newels and column wraps to meet your design requirements or for historic restoration.
• INTEX Newels and Column Wraps can be applied around existing structural members or used in stand-alone, non-structural applications, delivering everything needed for a quick, easy and secure installation.
• Split pedestal base options available for newels and column wraps: plain, 4-side, inline, corner and 3-side. Column wraps are available in standard 6, 8, 10 and 12-inch widths and 8, 9, 10 and 12-foot heights complete with mounting brackets, caps, base trim, PVC adhesive and everything needed to finish installation.
• Make 4 x 4 posts look like 10” x 10” columns, or use column wraps to accent or match other trim components.
• INTEX Newel and Column Wraps are compatible with INTEX Rail Systems.
• INTEX Newel and Column Wraps can be painted, allowing for limitless design possibilities.
